

EXTRA INFORMATION INSERTING THE RECORD EN VINYL CLEANER PRO

6.2.3 Inserting the record

Inserting the record properly helps to ensure good cleaning results without damaging the record.

1. Insert the record vertically into the slot. Make sure that the record is inserted into the designated retainer (picture 6.1). Then turn the record to the left with gentle pressure so that the driving rings can grip and the record can be transported safely.

CAUTION !

If a record is inserted as shown in picture 6.2, the record might get damaged. If the record is not transported, turn off the machine immediately and insert the record properly. Then restart the machine. No liability is assumed for damages. These damages are detectable by microscope.
